

106.2 Self Reflection Report

Conor Cook

I feel as a group we really worked well together. We have a lot of experience working together as we've done assignments before and we worked really well together in them. Our communication was really good and even when people worked from home, we stayed in communication with them so we could still make progress.

However I did considerably less than I would've liked to in this assignment. It took me over three weeks to get one page complete, granted it was the main page of the program and we were only introduced to QT Creator less than a week before the start of the assignment. But it is still considerably less than I would've liked to have done. However towards the end of this assignment I believe I have contributed a lot for the completion of this assignment. I have gotten four users for testing our program, I have edited the video for our recorded presentation and I have done a large amount on the main document.
